

Industry 4.0 Masterclasses

Hosted at the Industry 4.0 Economic forum

Discover the underlying disruptive forces and drivers of the paradigm shift

Get latest insight to the 4th industrial revolution:

1. 1st wave of the Industry 4.0 (2009-2016): Digitalization, Internet of Things, Advanced Analytics, Robotics and Cloud Computing, 3D Printing and Augmented Reality
2. 2nd wave of the Industry 4.0 (2016-2025): Artificial Intelligence, Blockchain, Smart Automation, Future of Energy, 6G Communications and Autonomous Systems
3. 3rd wave of the Industry 4.0 (2025- ...): Cybersecurity, Quantum Technology, Neurotechnology, Nanotechnology, Bioinformatics and Advanced Material
 - Discover the latest management principles, technique and tools on how to apply the Industry 4.0 topics
 - Chart out the future opportunities and how to respond
 - Detect where to transform and when to innovate

09:00 Opening remarks

09:15 Introduction to Industry 4.0

10:00 How to apply the 4.0

11:00 Opportunities and challenges

12:00 Lunch and Network

13:00 How to realize growth, operational excellence and competitiveness

14:00 Where to transform and when to innovate

15:00 Industry 4.0 roadmap

16:00 Conclusion and Closing

16:15 Certification Ceremony
